### **DETAILED ACTION**

This Office Action is in response to Applicant's After Final Response, filed 1-13-05, which has been entered and considered. Claims 1 and 3-24 are currently pending.

#### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance for claims 1 and 3-24: the prior art of record does not teach or disclose or make obvious a process for manufacturing an integrated circuit package, comprising inter alia: placing one of a heat spreader and a substrate in a mold cavity of a mold, and releasably clamping the other of said heat spreader and said substrate to a die of said mold cavity, such that at least one collapsible spacer is disposed between said heat spreader and said substrate.

The prior art of record discloses the above claim elements, except Sono does not disclose releasably clamping one of the substrate and heat sink to the mold. Sono discloses securing the heat sink in the mold cavity by vacuum suction (Fig.3E), and securing the lead frame leads to the mold using positioning pins (Fig.3A). However, neither of these disclose "releasably clamping a heat sink or substrate." Subsequent to an updated search of the relevant prior art, this application is found to be in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
